Safety Instructions:

- Use the product on stable, level surfaces to prevent tipping.
- Load capacity per drawer is 15 kg. Do not overload drawers to avoid damage or injury.
- During assembly, make sure that all parts are correctly installed to ensure stability.
- Keep children away from the appliance to prevent injury from tipping over or becoming trapped. Use under adult supervision.
- Stability may be impaired if used incorrectly. Do not pull out drawers beyond the maximum extension.
- Secure access to the keys of the central locking system to prevent unauthorised access.
- When used in the commercial sector, additional fixings are required to prevent tipping.
- Avoid contact with harmful substances on the surface of the cabinet.
- If the product is damaged, take it out of operation until it has been repaired.
- Regularly check drawer fittings for damage or wear.
