Safety Instructions:

- The maximum load capacity per drawer is 15 kg and should not be exceeded in order to avoid damage or danger.
- Make sure that the drawer cabinet is placed on a stable, level surface to prevent it from tipping over.
- Place the product out of the reach of children to avoid injury. Small parts can pose a choking hazard.
- Do not overload or overstretch drawers when pulling them out to prevent them from tipping over or falling out.
- Use the central locking system securely, preferably with a key, to prevent accidental opening and unauthorised access.
- Regularly check the functionality of the drawers and the central locking mechanism.
- Always provide users with clear instructions and safety information.
- Only pull drawers out as far as they will go to prevent them from falling out.
- Avoid using drawer cabinets near water or moisture to prevent corrosion.
- Improper use can lead to a risk of injury; observe the instructions for use and draw attention to the risk of injury due to improper handling when closing the drawers.
- Do not pull on an open drawer with heavy weight to prevent it from tipping over.
