Please note the technical data of the products!

Article Numbers: 157714, 157713, 157712

Safety Instructions:

- Use the ladder on a stable, level surface to prevent it from tipping over.
- Do not load beyond the maximum load capacity to avoid structural damage.
- Before each use, check the ladder for cracks or other damage that could impair safety.
- Do not use near electrical cables or during thunderstorms.
- Keep out of the reach of children to avoid accidents.
- Read the user manual before use.
- Observe safety precautions, especially to avoid falls.
- Only one person on the ladder at a time.
- Do not exceed the maximum working height as specified in the instructions.
- Anti-slip toe caps must be intact and checked regularly for wear.
- Do not use the ladder in unfavourable weather conditions such as strong winds.
- Avoid spilling liquids to minimise the risk of slipping.
- Use railings or other safety measures when working at height.
- Ensure that the ladder is fully extended and securely engaged.
- Observe body weight and factory-recommended maximum load.
- Do not use in the immediate vicinity of a source of danger, e.g. electrical cables.
