## Safety Instructions:

- Caution: Sharp tools and sharp edges. Avoid cutting injuries by exercising caution and wearing suitable protective equipment (gloves, safety goggles).
- Always use personal protective equipment (PPE), including safety goggles, gloves and hearing protection, to avoid injury.
- Keep the product out of the reach of children as it is not suitable for persons under the age of 16.
- Before use, ensure that the tool, the spot drilling bit and the machine are not visibly damaged and are correctly secured.
- Ensure that the machine is correctly adjusted, including appropriate speed and cutting speed, to avoid overheating and tool wear.
- Avoid use in the vicinity of flammable materials and in areas with unprotected electrical components.
- Only use the spot drill in well-ventilated areas to minimise exposure to vapours and metal chips.
- Ensure that all safety devices on the machine are functional before use.
- Only use for the intended purpose and observe the machine manufacturer's safety instructions. Improper use poses a risk of injury.
- Store the product in a dry place and carry out regular checks for wear or damage.
- Do not use without appropriate training. Follow the machine operating instructions and the recommended cutting speed.
- Ensure that the spot drill is only installed on compatible machines. If you are unsure, contact the manufacturer.
- Keep your distance from other people while working and keep the work area clean and tidy to avoid tripping hazards.
- Use suitable clamping devices to hold workpieces securely in place.
