Safety Instructions:

- Danger from sharp cutting edges; use suitable personal protective equipment (e.g. safety goggles, gloves).
- Please only use the drill bit with suitable machines and tools that are suitable for the intended purpose.
- Ensure that the workpiece is securely clamped to prevent uncontrolled movements and slipping.
- Avoid overloading the drill bit; do not exceed the recommended speeds.
- Permanent thermal stress can lead to discolouration and material damage; allow to cool down after use.
- Maintain the machines regularly to ensure safe use of the drill.
- Use only by qualified personnel to avoid injury.
- Do not use the product in the vicinity of flammable materials.
- Avoid injury from slipping or uncontrolled rotation of the drill bit if used incorrectly.
- Wear protective equipment such as eye and ear protection to avoid injury from chips and noise.
- For storage and transport, ensure that the drill bits are protected from damage and heat.
- Avoid use in wet conditions to minimise the risk of electric shock.
- Store the drill safely and out of the reach of children to prevent accidents.
- Ensure that the drill is correctly clamped to ensure safe operation.
- Check the drill regularly for damage and replace damaged tools immediately.
- Disconnect the machine from the power supply before changing the drill bit.
- Read the instructions for use and safety information carefully before use.
- Set a suitable cutting speed and feed rate to avoid overheating.
- Suitable for use under high thermal stresses, but the material compatibility of the workpiece should be taken into account.
- Product not suitable for children under 12 years of age.
- Use only by trained persons.
- When drilling in metal materials, ensure that workpieces are securely fixed.
- Avoid high-speed operation, especially when processing hard materials.
- Regularly inspect the drill for damage or wear to prevent failure during use.
- Wear suitable personal protective equipment (PPE) when drilling, including hearing protection in noisy conditions.
- Avoidance of overheating through continuous cooling during drilling.
- Protect from excessive heat and moisture.
- Do not use in materials that can release explosive gases.
- The product is only suitable for use by specialised personnel.
