Article Numbers: 306365, 306364, 306363, 306362, 306361, 306360, 306359, 306358

Safety Instructions:

- Risk of suffocation and falling due to improper use of the ladder. Ensure that the ladder is used and secured correctly.
- Risk of injury due to improper transport or handling of the ladder.
- The ladder must stand on stable, firm and level ground.
- Do not exceed the maximum load on the ladder.
- Before use, check that the ladder complies with the standard and is intact and load-bearing.
- Avoid use in wet, damp or windy conditions to prevent the risk of slipping and tipping over.
- Safety catches must be functional before the ladder is used.
- Children should only use the ladder under supervision.
- Keep a safe distance from electrical cables to avoid electric shocks.
- Do not use the top rungs as a standing surface and never climb above the specified height.
- Regular inspection of the ladder for visible damage is necessary before each use.
- Never lean sideways against the ladder or lean out too far.
- Two healthy hand movements are required at all times during use.
- Only qualified personnel should use the ladder.
- Outriggers must be fully extended and correctly locked.
