## Sicherheitsschrank Typ 90 asecos Q-CLASSIC-90, Flügeltüren, B 893 x T 615 x H 1953 mm

**Hersteller/Verantwortliche Person:** asecos GmbH, Weiherfeldsiedlung 16-18, 63584 Gründau, Deutschland

**E-Mail:** info@asecos.com

Bitte beachten Sie die technischen Daten der Artikel!

**Artikelnummern:** 461865, 461864, 461863, 461862, 461861, 461860, 461859

### Sicherheitshinweise:

- Flammable liquids and hazardous substances must be stored properly according to safety regulations. Use only suitable personal protective equipment when handling chemicals.
- Ensure the cabinet is for indoor use only on a stable, level surface to prevent instability. Secure against accidental opening to control access to hazardous substances.
- Adhere to maximum load capacity: shelves 75 kg and drip trays 22 liters. Do not overload.
- Regularly inspect and maintain ventilation systems to ensure functionality and prevent vapor accumulation. Keep exhaust outlets clear for proper air exchange.
- Provide safety instructions in a language understandable to all users. Include guidance on emergency measures in case of leaks or accidents.
- Ensure access protection by locking with a cylinder lock to prevent unauthorized access, and always keep the cabinet closed and locked.
- The cabinet is suited for storing toxic substances, dangerous chemicals, and flammable liquids compliant with F90 fire resistance regulations. Avoid storage near combustible materials and protect against unauthorized access.
- Follow applicable safety data sheets and local fire safety regulations to minimize risks.
- Only store dangerous substances with necessary safety precautions in place, particularly GHS category 1-3 chemicals.
- Install exhaust systems following technical air duct requirements to ensure safe operation.
- The product is intended exclusively for the storage of hazardous materials, including toxic substances and incendiary liquids.
- Keep the cabinet out of children's reach to reduce safety risks.
