In principe zijn al onze papiersoorten geschikt voor dagelijks kantoorgebruik op standaard kantoormachines, tenzij ze gemarkeerd zijn voor speciale toepassingen (zoals thermisch papier voor faxapparaten). Zelfs ecologisch papier heeft nu zeer representatieve eigenschappen voor de werking van de machine. De keuze van het papier wordt dus in de eerste plaats bepaald door het beoogde gebruik, het gebruikte drukproces, milieuoverwegingen en - steeds vaker - leeftijdsbestendigheid in overeenstemming met de normen.
